KATA PENGANTAR

Dalam rangka meningkatkan ketersediaan dan pelayanan data dan informasi pertanian, Pusat Data dan Sistem Informasi Pertanian menerbitkan Buku Statistik Harga Komoditas Pertanian. Buku ini berisi perkembangan harga beberapa komoditas Pertanian baik ditingkat produsen maupun konsumen selama periode lima tahun terakhir dan juga bulanan untuk data tahun terakhir.

Buku Statistik Harga komoditas Pertanian tahun 2020 ini menyajikan data harga yang bersumber dari Kementerian Perdagangan untuk harga eceran di pasar Ibukota Provinsi, harga gabah, harga produsen dan konsumen bersumber dari Badan Pusat Statistik (BPS), Harga Pasar Induk Beras Ciping (PIBC) Jakarta, harga Internasional sektor pertanian yang bersumber dari Website *Worldbank*. Harga yang disajikan mencakup komoditas pertanian yang dirinci menurut sub sektor tanaman pangan, hortikultura, perkebunan dan peternakan.

Kepada semua pihak yang telah memberikan dukungan dan terlibat langsung dalam penerbitan buku ini, kami sampaikan penghargaan dan terima kasih. Kritik dan saran sangat diharapkan guna penyempurnaan dan perbaikan buku statistik harga komoditas pertanian ditahun mendatang. Kepada pengguna data, semoga buku statistik harga ini dapat memberi manfaat.

Jakarta, Desember 2020 Kepala Pusat Data dan Sistem Informasi Pertanian.

PENJELASAN UMUM

1. Harga Eceran/Konsumen di Ibukota Provinsi

Data harga eceran di ibukota provinsi yang dipublikasikan dalam Buku Statistik Harga Komoditas Pertanian 2020 ini bersumber dari Kementerian Perdagangan. Teknik pengumpulan data/pencatatan harga eceran ini didasarkan pada SK Menperindag No : 522/MPP/Kep/11/1998 tanggal 11 Nopember 1998 tentang Pembakuan Format Laporan Harga Harian Bahan Pokok Pangan dan Mekanisme Penyampaian Laporan Harga Harian Bahan Pokok Pangan dari Kantor Dinas Perindustrian dan Perdagangan. Beberapa ketentuan pada SK tersebut antara lain :

- a. Lokasi pencatatan harga adalah pasar tradisional yang tetap/menetap, tidak berpindah-pindah, pasar cukup representative untuk dikunjungi oleh konsumen golongan menengah ke bawah.
- b. Petugas Pencatat harga (dari dinas) harus dikenal oleh para pedagang yang dimintai informasi harga barang kebutuhan pokok masyarakat atau paling tidak si pedagang diberitahu bahwa dia adalah petugas tetap/pengganti untuk mencatat harga setiap hari dari Dinas Perindustrian dan Perdagangan yang tujuannya adalah agar si penjual/pedagang dapat memberikan harga yang tepat/pas dari komoditi tersebut. Harga yang dicatat adalah adalah harga final (transaksi jualbeli) dan bukan harga penawaran yang masih bisa naik/turun.
- c. Waktu pengambilan/pencatatan harga harus tetap misalnya yaitu diantara jam 08.00 s/d jam 10.00 waktu setempat.
- d. Obyek survey. Pasar-pasar tertentu yang sudah ditentukan dalam Keputusan Menteri Perindustrian dan Perdagangan No. : 522/MPP/ Kep/11/1998.

Pada bulan Mei 2018, Kementerian Perdagangan menerapkan kebijakan untuk tidak merilis data eceran di ibukota provinsi. untuk itu mulai bulan Mei 2018 penyajian data eceran di ibukota provinsi bersumber dari Wabsite Bank Indonesia, Pusat Informasi Harga Pangan Strategis Nasional (https://hargapangan.id/)

Komoditas pangan yang disajikan di Pusat Informasi Harga Pangan Strategis adalah 11 komoditas pangan yang memiliki kontribusi signifikan dalam pembentukan angka inflasi, khususnya untuk inflasi volatile food, dengan rincian komoditas sebagai berikut : beras, bawang merah, bawang putih, cabai merah besar, cabe merah keriting dan cabe rawit merah, daging sapi, daging ayam ras, telur ayam ras, gula pasir dan minyak goreng.

Pengumpulan data harga pangan dilakukan setiap hari kerja (Senin s.d. Jumat), pukul 09.00 s.d. 11.00 wib, dan dilaporkan ke Bank Indonesia pada pukul 10.00 -12.00 wib, sehingga diharapkan seluruh data dapat dipublikasikan pada pukul 13.00 wib. Lokasi pengumpulan data dilakukan untuk sebanyak 82 kota/kabupaten yang menjadi sampel penghitungan inflasi Indeks Harga Konsumen (IHK) Nasional oleh Badan Pusat Statistik.

Jenis dan jumlah sampel pasar yang disurvei adalah 2(dua) pasar tradisional untuk masing-masing kota/kabupaten dan merupakan pasar utama yang tergolong besar, yaitu dari segi ukuran luasnya maupun banyaknya pengunjung. Selain itu, berlokasi di dalam kota/kabupaten yang telah ditentukan, tidak berada di pinggiran atau luar kota/kabupaten tersebut.

Jumlah pedagang yang disurvei setiap pasar tradisional adalah 2 pedagang untuk setiap komoditi. Pemilihan pedagang bersifat tetap/panel untuk menjamin kontinuitas pencacahan, serta berlokasi tidak terlalu berdekatan antar satu pedagang dengan pedagang lainnya untuk

mengantisipasi kecenderungan homogenitas harga. Selain itu, pedagang tersebut melakukan aktivitas pada tempat yang tetap/permanen/tidak berpindah-pindah, diprioritaskan yang memiliki omset penjualan relatif besar. Apabila pedagang yang menjadi sampel tidak melakukan aktivitas untuk jangka waktu yang tidak dapat ditentukan (permanen), maka akan diganti dengan pedagang lainnya dengan kriteria persyaratan yang sama. Apabila terjadi bencana di kab/kota tertentu yang mengakibatkan pasar di kota/kabupaten tersebut tidak beroperasi pada hari tertentu, maka data hari tersebut akan diambil dari data pada hari sebelumnya.

2. Harga Produsen

Data harga produsen yang dipublikasikan pada Buku Statistik Harga Komoditas Pertanian Tahun 2020 ini bersumber dari Badan Pusat Statistik (BPS). Harga produsen (*farm gate*) adalah harga transaksi antara petani (penghasil) dan pembeli (pedagang pengumpul/tengkulak) untuk setiap komoditas menurut satuan setempat.

Satuan yang digunakan adalah satuan yang lazim dipakai untuk pembelian atau penjualan secara partai besar. Satuan dari masing-masing jenis barang harus jelas dan tegas, misalnya: kg, kwintal (100 kg), 10 buah, ikat dan sebagainya. Satuan setempat yang umumnya dipakai didaerah telah dikonversi kedalam satuan standar.

Pengumpulan data harga produsen sektor pertanian oleh BPS dilakukan melalui survei harga produsen perdesaan yang merupakan salah satu kegiatan dalam rangka perhitungan indeks harga yang diterima petani dan nilai tukar petani. Metode pengumpulan data harga produsen sektor pertanian dilakukan dengan menggunakan daftar HD-1 sampai dengan HD-4 yaitu daftar yang digunakan untuk mencatat harga produsen yang dihasilkan petani dan harga eceran barang/jasa untuk keperluan produksi pertanian tanaman pangan, hortikultura, perkebunan rakyat dan

peternakan. Pelaksanaan pencatatan daftar HD tersebut diatas dilakukan dengan Koordinator Statistik Kecamatan (KSK) dengan wawancara langsung ke petani yang menjual hasil petani pada periode tanggal 1 sampai dengan tanggal 15 setiap bulan, sedangkan pencacahan dilakukan pada tanggal 15 setiap bulan. Pencatatan data harga setiap komoditas dilakukan terhadap 3-4 petani dan selanjutnya harga yang terbanyak muncul (modus) atau rata-rata harga dari petani-petani tersebut dicatat dalam daftar isian.

Formula perhitungan rata-rata harga tiap jenis barang untuk harga produsen di masing-masing provinsi setiap bulannya menggunakan rata-rata harga sederhana (*Simple Average*) dari sampel yang masuk ke BPS pada setiap bulan yang bersangkutan, sebagai berikut:

$$\bar{P}_{ni} = \frac{\sum_{S=1}^{m} P_{ni}}{m}$$

 $P_{\it ni}=$ Rata-rata harga jenis barang i pada bulan ke-n

 $\sum P_{ni} =$ Jumlah harga jenis barang i pada bulan ke-n

m = Jumlah sampel

3. Harga Konsumen Perdesaan

Data harga konsumen perdesaan yang dipublikasikan pada Buku Statistik Harga Komoditas Pertanian Tahun 2020 ini bersumber dari Badan Pusat Statistik (BPS). Harga konsumen/eceran pedesaan adalah transaksi antara penjual dan pembeli secara eceran di pasar setempat untuk tiap jenis barang yang dibeli dengan tujuan untuk dikonsumsi sendiri dan bukan untuk dijual kepada pihak lain. Satuan yang dipakai dalam pengumpulan data harga ini adalah satuan baku yang lazim dipakai untuk pembelian

secara eceran misalnya: kilogram (kg), 100 gram(ons), liter (1), buah, butir, bungkus, batang, pasang dan lain sebagainya. Jika satuan setempat yang dipakai di daerah tidak sesuai dengan yang ada dalam daftar isian maka harus dikonversikan terlebih dahulu agar sesuai dengan satuan baku yang ada pada daftar isian.

Metode pengumpulan data harga konsumen di perdesaan dilakukan oleh Koordinator Statistik Kecamatan (KSK) atau Mantri Statistik (Mantis) melalui wawancara langsung ke pedagang eceran yang berada di pasar pedesaan. Daftar yang digunakan dalam Daftar HKD-1 digunakan untuk mencatat harga eceran barang/jasa kelompok makanan untuk keperluan konsumsi rumah tangga petani. Pencacahan dilakukan setiap bulan pada tanggal 15 atau pada hari pasar yang terdekat dengan tanggal tersebut. Pencatatan harga komoditas di masing-masing pasar dilakukan terhadap tiga atau empat pedagang. Harga dicatat dalam register yang merupakan harga yang terbanyak muncul (modus) atau rata-rata harga. Hasil pencatatan yang ada dalam register HKD1 tersebut selanjutnya dipindahkan di daftar HKD-1 yang kemudian di kirim ke BPS Provinsi dan BPS pusat.

Perhitungan rata-rata harga setiap jenis barang untuk harga konsumen persedaan setiap bulannya dengan menggunakan rata-rata harga sederhana dan sampel yang masuk/diterima di BPS pada bulan yang bersangkutan.

Formula perhitungan dengan menggunakan rata-rata harga (sample average), yaitu:

$$P_{ni} = \frac{\sum_{S=1}^{m} P_{ni}}{m}$$

 $oldsymbol{P}_{\scriptscriptstyle ni}$ = Rata-rata harga jenis barang i pada bulan ke-n

 $\sum P_{ni} =$ Jumlah harga jenis barang i pada bulan ke-n

m = Jumlah sampel

Ketersediaan data konsumen dan produsen bersumber dari BPS lebih lambat yaitu data terakhir tersedia sampai dengan 2013 – 2017 sehingga penyajian datanya 5 (lima) tahun terakhir yaitu tahun 2017.

4. Harga Gabah

- a. Pemantauan harga produsen gabah dilaksanakan di 25 provinsi di Indonesia (tidak termasuk Sumatera Selatan, Bengkulu, Bangka Belitung, Kepulauan Riau, DKI Jakarta, Gorontalo, Maluku, dan Maluku Utara).
- b. Wilayah pencacahan mencakup 158 kabupaten, 335 kecamatan sampel.
- c. Responden adalah petani sebagai produsen padi yang melakukan transaksi penjualan gabah.
- d. Pengumpulan data harga produsen gabah dilakukan dengan pencatatan mingguan dan bulanan.
- e. Pencatatan mingguan dilakukan jika terjadi panen raya pada wilayah sampel terpilih. Pada musim panen raya biasanya produksi padi berlimpah dan banyak transaksi penjualan gabah oleh petani.
- f. Sedangkan pencatatan bulanan dilakukan tiap tanggal 10-15 tiap bulan. Pencatatan bulanan ini diterapkan pada saat panen raya berakhir atau tidak ada panen.

BAB II HARGA KONSUMEN PERDESAAN

Grafik 2. Grafik Harga Konsumen Perdesaan di Sentra Produksi di Sub Sektor Tanaman Pangan, Hortikultura, Perkebunan dan Peternakan Tahun 2015 – 2019

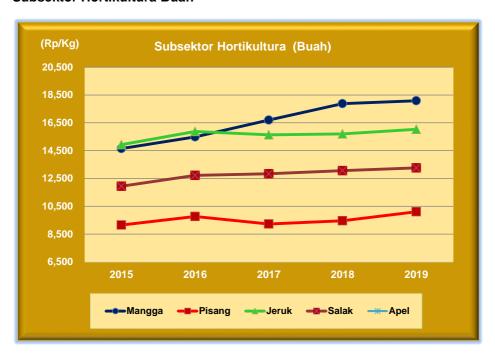

a. Subsektor Tanaman Pangan

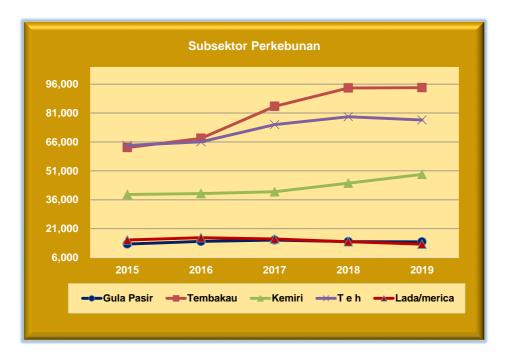

b. Subsektor Hortikultura Sayuran

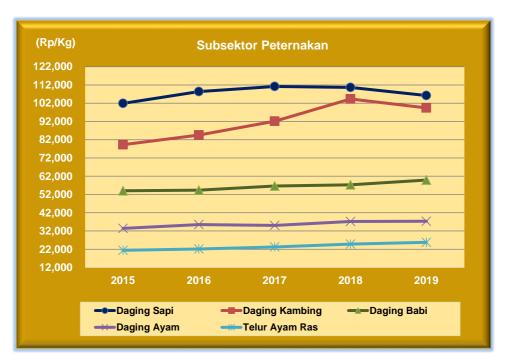

c. Subsektor Hortikultura Buah

d. Subsektor Perkebunan

e. Subsektor Peternakan

Tabel 2.1. Perkembangan Rata-Rata Harga Konsumen Pedesaan Komoditas Pertanian di Indonesia, 2015 – 2019

					Tahun			Rata-rata
NO	KOMODITI	SATUAN	2015	2016	2017	2018	2019	pertumbuhan 2015-2019 (%)
1	Beras	Rp/Kg	9,760	10,093	10,744	11,394	11,355	3.89
2	Jagung Pipilan	Rp/Kg	5,933	6,357	6,638	6,596	7,232	5.14
3	Kacang Hijau	Rp/Kg	19,858	20,765	20,706	20,938	20,901	1.31
